5. Data Sharing & Access

(FY 2013) PIA: Retention & Disposal What is the data retention period? Answer: The retention period is seven (7) years for each electronic transmission. This will be based on policy and regulation. Data related to PHI is 75 years from death or date of last access, whichever is longer. Transaction data is seven years. Audit and archive based on RCF 10-1. Explain why the information is needed for the indicated retention period? Answer: This will be based on policy and regulation. The agencies retain information in support of issues, references, and/or legal purposes. What are the procedures for eliminating data at the end of the retention period? Answer: Data is not eliminated, it is controlled in accordance with National Archives and Records Administration (NARA) control schedules determined by agency. Where are these procedures documented? Answer: VA HBK 6300.1 Records Management Procedures explains the Records Control Schedule procedures. How are data retention procedures enforced? Answer: VA Directive 6300, Records and Information Management contains the policies and responsibilities for VA 's Records and Information Management program, VA Handbook 6300.1, Records Management Procedures, contains mandatory procedures for the proper management of records effectively and efficiently throughout their life cycle. Neither the directive or handbook is a Records Control Schedule. Procedures are enforced by Records Management Staff and VA Records Officers. Has the retention schedule been approved by the National Archives and Records Administration (NARA)

7. Security Page 8

The minimum security requirements for our high impact system cover seventeen security-related areas with regard to protecting the confidentiality, integrity, and availability of VA information systems and the information processed, stored, and transmitted by those systems. The security-related areas include: access control; awareness and training; audit and accountability; certification, accreditation, and security assessments; configuration management; contingency planning; identification and authentication; incident response; maintenance; media protection; physical and environmental protection; planning; personnel security; risk assessment; systems and services acquisition; system and communications protection; and system and information integrity. Our facility employs all security controls in the respective high impact security control baseline unless specific exceptions have been allowed based on the tailoring guidance provided in NIST Special Publication 800-53 and specific VA directives.

(FY 2013) PIA: Additional Comments

Add any additional comments or information that may have been left out for any question. Please indicate the question you are responding to and then add your comments.

Tab 4 lines 28-44 files and databases:
Internal Sharing: VA Organization The application will interface to VA Purchase Care databases, feeding a repository with a claims scoring tool that will score incoming claims for risk of fraud, waste and abuse.
PCI gathers information from the following systems. VistA, Fee Basis Claims Software (FBCS), Corporate Data warehouse (CDW), Compensation, Pesion, Education System (CP&E)
Tab 5 Row 4, Column D
PCI is deployed at AITC to store data fetched from multiple VA internal sites. The PCI reporting engine server allows business users from multiple locations within VA environment. The PCI scoring tool allows all claim processing systems deployed at sites to interact with the scoring tool, the reporting tool and the predictive analytics tool to access data. These VA internal agencies access PCI claim data information: Office of Information and Technology (OI&T), Congressional Budget Office (CBO), Service Delivery and Engineering (SD&E).
